GENERAL INFORMATION

SafetyRespect Stairways are available in two widths, 70 and 100 cm, and six different lengths. The units can safely be connected to create a longer Stairway.

Each Stairway is supplied with two handrails that adjust to the inclination angle. The foldable steps always remain horizontal, regardless of the inclination.

The Stairways are made of galvanised square steel tubes. The steps are made of non-slip, punched sheet metal and have a high degree of stability. All necessary fasteners are included in the delivery.

The Stairways can be pre-assembled to the required length before transport or assembled on site. To simplify transport and storage, the Stairways can be folded flat.

All Stairways are manufactured in accordance with the European standard EN 12811. Load class 2 and max 1,5 kN/m². The inclination angle shall be $30^{\circ} \leq 55^{\circ}$.

Ensure Stairways are kept free of ice, snow or other external substances that can affect the function or usage.

SAFETY

To reduce risks at the worksite, make a documented risk assessment and action plan. The following risks and measures are always present when using the product:

CHECK MATERIAL

Check all parts for mounting. If in doubt, contact SafetyRespect and replace or discard damaged material.

CONFIGURATIONS

STAIRWAY 3–18 STEPS

NO.	ART. NO.	DESCRIPTION	WEIGHT
1	5060003	Stairway, width 70 cm, 3 steps	39 kg
1	5061003	Stairway, width 100 cm, 3 steps	43 kg
2	5060006	Stairway, width 70 cm, 6 steps	61 kg
2	5061006	Stairway, width 100 cm, 6 steps	70 kg
3	5060009	Stairway, width 70 cm, 9 steps	83 kg
3	5061009	Stairway, width 100 cm, 9 steps	97 kg
4	5060012	Stairway, width 70 cm, 12 steps	110 kg
4	5061012	Stairway, width 100 cm, 12 steps	127 kg
5	5060015	Stairway, width 70 cm, 15 steps	147 kg
5	5061015	Stairway, width 100 cm, 15 steps	170 kg
6	5060018	Stairway, width 70 cm, 18 steps	174 kg
6	5061018	Stairway, widht 100 cm, 18 steps	200 kg

COMPONENTS

7	5161181	Side Beams for 18-Step Stairway (set=4 pcs)	4 pcs

ADDITIONAL COMPONENTS

NO.	ART. NO.	DESCRIPTION	WEIGHT
1	5061001	Stairway Support 70 (for configuration 15–18 steps)	
1	5061005	Stairway Support 100 (for configuration 15–18 steps)	
2	50610019	Crocodile 290	
3	5066001	Maxi support middle piece (for configuration 21–36 steps)	13,5 kg
4	5066002	Maxi support end piece (for configuration 21–36 steps)	6,3 kg
5	5066007	Maxi support connector (for configuration 21–36 steps)	1,1 kg
6	5061103	Scaffold Fix BT	

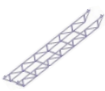

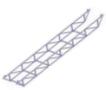

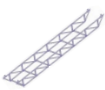

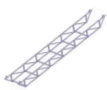

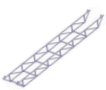

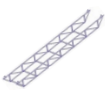

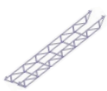

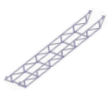

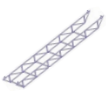

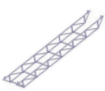

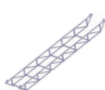

SUPPORT

CONNECTION OF TWO STAIRWAYS

Stairway support or maxi support is needed for Stairways 15–36 steps, see table 1 below. Additional components are needed for Maxi support to Stairway 24–36 steps, see table 2 below.

Table 1: Additional support for connections of Stairway.

Stairway 9-steps

Stairway 12-steps

Stairway 15-steps

Stairway 18-steps

Stairway 21–36 steps

Table 1: Dimensions for Stairway 21–36 steps.

STEPS	HEIGHT (Y)	DISTANCE (X)
21	2900–4700 mm	3300–5000 mm
24	3400–5500 mm	3900–5800 mm
27	3750–6150 mm	4300–6500 mm
30	4200–6750 mm	4800–7100 mm
33	4600–7400 mm	5300–7900 mm
36	5000–8100 mm	5700–8600 mm

INCLINATION

According to EN 12811-1 the Stairways incline must be kept in $30^\circ \leq 55^\circ$. Calculate the horizontal distance from the overall height and the angle of inclination.

Diagram 1: Inclination diagram.

MOUNTING

STAIRWAY

**D**

Step on the stairway
and push the handrail
to fold it out.

**E**

Secure the stairway
with screw.

**F**

Secure the locks
at both sides.

CONNECTIONS

C

Connect the sidebeams with screws x2 and mount the complete stairway according to instructions shown in page 10-11.

STAIRWAY SUPPORT

For 15-21 steps mount the stairway support:

MAXI SUPPORT

For 24-36 steps mount the maxi support.

A

Attach end piece to 70 or 90 cm width of middle piece.

B

Attach x- amount of middle piece, see table 2 (page 7).

C

Attach end piece.

D

Attach x-amount of connectors to Stairway, see table 2 (page 7).

MAINTENANCE

REPAIR AND INSPECTION

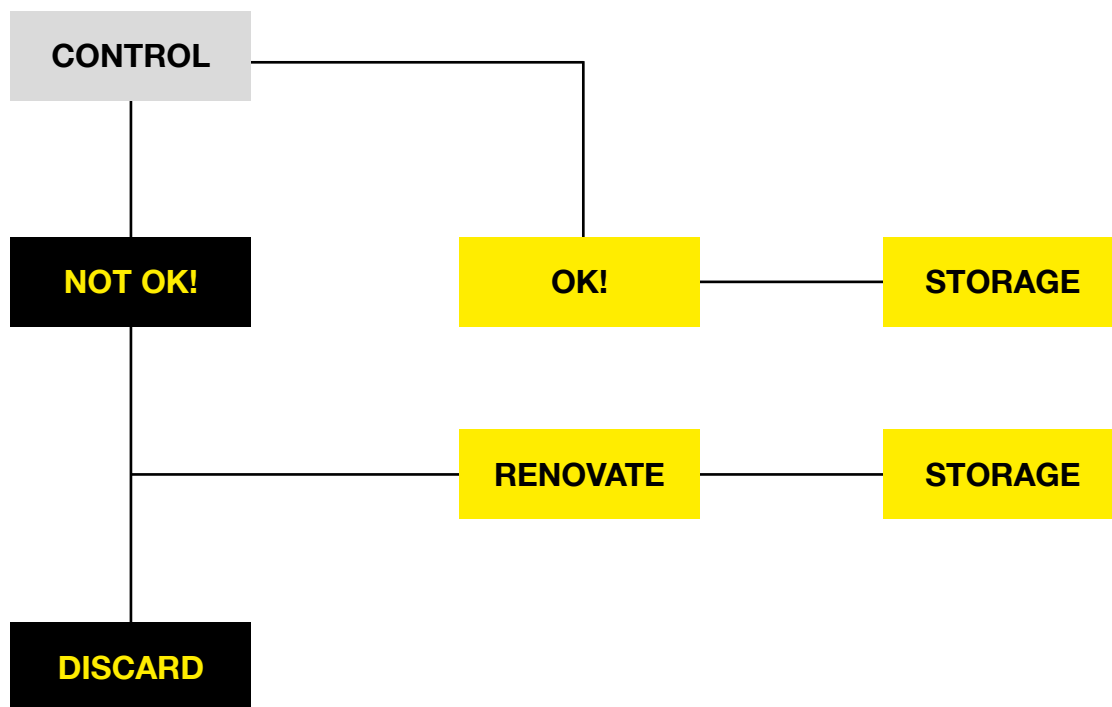

The products shall always be inspected by a person with the appropriate knowledge before being put back into use again. All repairs need to be performed by, or under the supervision, of a competent person (see below).

The product shall be visually inspected regularly. The interval may vary depending on the specific installation and should be taken into consideration in the risk analysis.

Check that:

- The parts match as they should.
- No deformations can be found.
- No cracks can be found.
- No alterations have been made to the system.
- No rust can be found.
- No other external influences can be found.

Clean the parts when required.

STORAGE, CARE AND INSPECTION

Store in a dry place and keep away from heat sources, corrosive materials, acids, solvent oils etc. It is the installer's responsibility to carry out an initial visual inspection of the product and attachment system. All damage must be reported and corrected before any work commences.

COMPETENT PERSON

A competent person is someone who has been given the appropriate training and been authorized by SafetyRespect to perform inspections and repairs.

SAFETYCHECK STAIRWAYS

Safetycheck is also available on mobile devices online: safetycheck.se
