SAFETY RESPECT®

PERSONAL FALL PROTECTION FOR SAFE WORK IN DEMANDING ENVIRONMENTS

Our products within personal fall protection are robust with high quality and at the same time easy to work with in demanding and exposed environments. The products comply with the latest updated EU regulation on personal fall protection equipment regarding product requirements, documentation, and traceability.

In addition to good products, knowledge and routines are important for the overall function. When you buy fall protection from us, we can offer inspection, service, and maintenance of the products. Through the Safetyrespect Academy, you can also take advantage of a comprehensive training package for various needs. Our training provides participants with knowledge and understanding of various

risks associated with falls, both through theoretical studies and practical exercises. In the training, we go through laws and regulations, fall risks, strategies and techniques, handling and control of equipment, and more. The training provides a certificate which is also mandated by law in some countries. See our website for more information about SafetyRespect Academy.

HARNESS SR TECHNIC

ART. NO. 962010 S, 962011 M-L, 962012 XL

Professional and comfortable harness for rope access, fall protection, and positioning. Equipped with quick-release buckles and easy to put on and take off.

- Two fall arrest attachment points (EN 361), front and back.
- Four loops for equipment attachment.
- Possibility to integrate chest ascender for rope climbing.
- User weight up to 150 kg.
- Accessory: Harness padding Art. no. 962018.
- EN 358, EN 361, EN 813, CE 1019, NFPA Class III, ANSI Z359.1.

HARNESS SR JÄMTLAND

ART. NO. 962051 S/M/L, 962052 XL/XXL

Well balanced and easily adjustable fall arrest harness that has good fit for most body types, and offers great mobility.

- Two fall arrest attachment points (EN 361), front and back.
- Very strong construction while being lightweight and compact.
- Comfortable also for women and allows space for the chest.
- Fall indicators with clear color coding.
- Two loops for equipment attachment, each up to 5 kg.
- Custom branding available with own colors and logos.
- Accessories: Padding, Trauma straps, Pockets, Tool Lanyards.
- EN 361.

HARNESS SR BODY

ART. NO. 962021 S/M/L, 962022 XL/XXL

Lightweight, flexible and compact fall arrest harness equipped with quick-release buckles for easy on and off.

- Two fall arrest attachment points (EN 361), front and back.
- Compact and lightweight construction.
- Two loops for equipment attachment, each up to 5 kg.
- Quick-release buckles on legs for easy on and off.
- Suitable for both horizontal and sloping work surfaces.
- Can be used for temporary suspension in the harness.
- Back attachment has a flat construction that does not affect comfort when wearing a backpack or breathing apparatus.
- Can be used together with positioning belt.
- EN 361, CE 1019.

CONSTRUCTION KIT

ART. NO. 967310

Harness SR Jämtland, Block SR IKAR steel 6 m, Lanyard steel I 100 cm 15 kN, 2 st. Carabiner alu oval 26 kN black triplock, Gear bag 35 l SR.

With our Construction kit, you get a lightweight and convenient fall protection tailored for work on slabs and roofs with flat surfaces. It includes a fall protection harness that is easy to put on and take off, has low weight, and is easy to work in. The included fall arrest block has a 6 meter long steel line, allowing you to move over larger areas without needing to change anchoring points. The block is certified for both horizontal and vertical work as well as work near sharp edges. The kit also includes a carabiner and a 1 meter steel sling. The products are delivered in a sturdy, waterproof backpack.

MOBILE PLATFORM KIT

ART. NO. 967300

Harness SR Jämtland, Block SR IKAR textile 1,8 m, Sling 60 cm 22 kN, 2 st. Carabiner alu oval 26 kN black triplock, Gear bag 35 l SR.

For those who work on a mobile platform, we have tailored a fall protection kit that provides great flexibility and freedom of movement. Since a platform has limited workspace, no long line is needed for anchoring - this kit includes a fall arrest block with a 1.8 meter long band with fall indicator. The fall arrest block is certified for both horizontal and vertical work as well as work near sharp edges. The included harness is easy to put on and take off, has low weight, and is easy to work in. The kit also includes a carabiner and a 0.6 meter anchoring sling. The products are delivered in a sturdy, waterproof backpack.

ROOF KIT

ART. NO. 967330

Harness SR Technic, Roof Line with Back up 20 m,
Lanyard steel I 100 cm 15 kN, Gear bag 35 l SR.

With our Roof Kit, you get support when working on sloping roofs. The included harness has padding in the waist belt and around the legs for higher comfort when standing on a steep roof or hanging over an edge. The harness has a good fit, is adjustable over the shoulders, around the waist, and legs, and can be used both as fall protection and for positioning. Anchoring to the roof is done with a rope that has a self-locking device for protection in case of a fall. The lock is also used to easily adjust the length of the rope. The kit includes a carabiner and a 1 meter steel sling. The products are delivered in a sturdy, waterproof backpack.

POSITIONING KIT

ART. NO. 967320

Harness SR Technic, Absorber reactor 140 EYE Y 155 cm + 2xK35,
Positioning line "Site" 2 m with Locker lock, Carabiner alu,
oval 26 kN ozone black triplock, Gear bag 35 l SR.

When you need to carry out several different kinds of work at height, such as work on a roof or scaffolding, your equipment must be flexible, comfortable, and safe. For this purpose, we offer our Positioning kit with a harness that has padding in the waist belt and around the legs for higher comfort. The harness has a good fit, is adjustable over the shoulders, around the waist, and legs. You secure yourself with a pair of sturdy ladder hooks with attached fall arresters. The kit also includes an easy-to-use positioning line. The products are delivered in a sturdy, waterproof backpack.

RESCUE KIT

RESCUE KIT WITH CASE

ART. NO. 966153 60 meter rope, with vacuum seal pack.
ART. NO. 966163 100 meter rope, with vacuum seal pack.

When working at height, there must be a functioning rescue plan. With our Rescue kit, you know that you have equipment that is safe and easy to use. The equipment is easy to use, regardless of the situation you are facing, whether it's a platform, slab edge, or roof. The equipment is vacuum-sealed to facilitate the annual inspection. As long as the packaging is intact and holds the vacuum, you know that the equipment is safe to use. You can easily do the inspection yourself.

RESCUE EXPANSION PACK

ART. NO. 966100

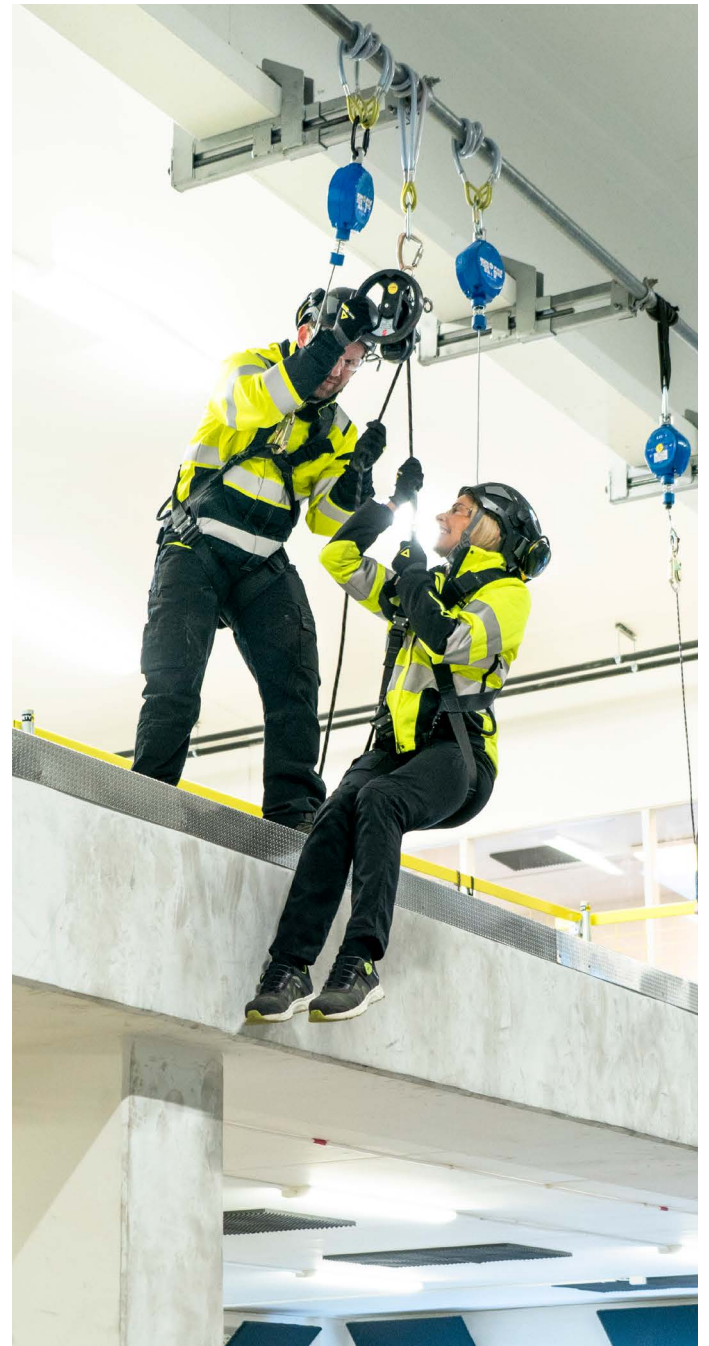

The Expansion Kit is for those with knowledge and the need to perform an active rescue of a colleague. This kit can be provided in vacuum packaging to facilitate the annual inspection.

BASIC RESCUE KIT 20 M

ART. NO. 966150

A user-friendly rescue kit designed to facilitate the lowering of a colleague who has become suspended in their personal fall protection.

RESCUE LADDER 6 M

ART. NO. 966045

This ladder is a solution that enables the rescue of a person who has fallen from a height, as well as the integration of a backup climbing support.

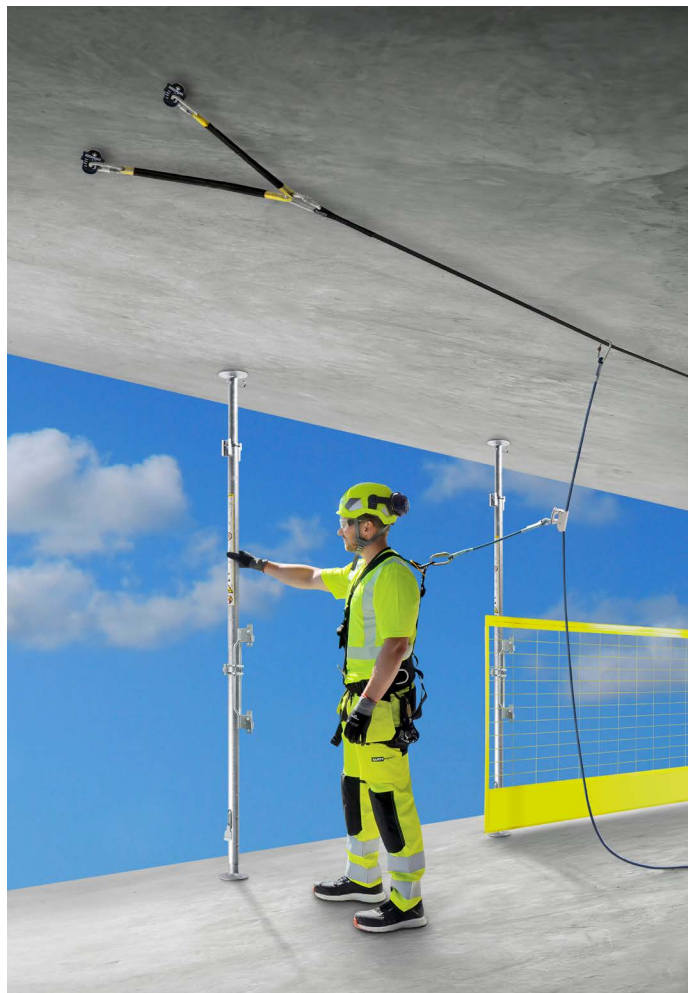

SCISSORSAFE SYSTEM

Scissorsafe is an anchorage system designed to prevent falls from height during construction work on concrete structures. The unique design of this anchoring system allows you to easily move the anchor point from one embedded Scissorsafe insert to another.

Anchoring points are crucial components in a personal fall protection system for securely connecting life lines, lanyards, fall arrestors, and rescue devices to the permanent structure. A cast in anchor system incorporated into the design of the structure provides both economic benefits and better safety at the workplace. You avoid drilling into the concrete to attach anchor points, and there's no need to load-test anchoring devices based on friction before other fall protection components can be connected.

Scissorsafe's anchoring points are created by nailing a two-part plastic mould onto the horizontal formwork before casting. When the form is then removed, all preparations are made to place anchor points above the user. Scissorsafe's unique mechanical solution allows the anchor to open in the cavity created in the concrete and then be locked by a carabiner at the anchor point.

- The system can be used for installing temporary edge protection, facades, balconies, and more.
- Economically advantageous as the system is reusable throughout the project.
- Creates a better work environment as no drilling is required in concrete, no noise or dust, and less work time at heights.
- Can be used for both fall arrest and fall restraint systems.
- Meets requirements according to EN 795, Class B.
